Dear Karen:

   This letter is to confirm our conversations with

you and [          ]regarding source modules and documentation for various load modules as shown on attached list.

   We would appreciate any documentation on these modules and, if possible, the associated source modules.  We are ready to provide the number of magnetic tapes required for obtaining source modules associated with the attached list.
   Pat O'Halloran, who is our primary system software person, also requested that I determine if you had a cross-referenced listing of all modules used by the online system. Since we know very little about how the GIM-II software works, this would enable us to know how modules are referenced by other modules.  If such a listing exists, we would be very appreciative of a copy of it also.

   The above requested documentation and the cross-referenced listing, if available, may be mailed to the following address:

     Special Agent C. David Evans
     Federal Bureau of Investigation
     JEH Building, Room 1358
     10th Street and Pennsylvania Avenue, N.W.
     Washington, D. C.   20535

   Thank you very much for your assistance in this matter.  If I can provide any additional information regarding this request, please contact me at the telephone number 324-5960.

       Sincerely yours,

       C. David Evans
       GIM-II Project Manager
